```

## Part 1 – Initial Setup

1.

EAX = FFFFFFFF

2.

```
CY/Carry = 0
OV/Overflow = 0
ZR/Zero = 0
PL/Sign = 0
```

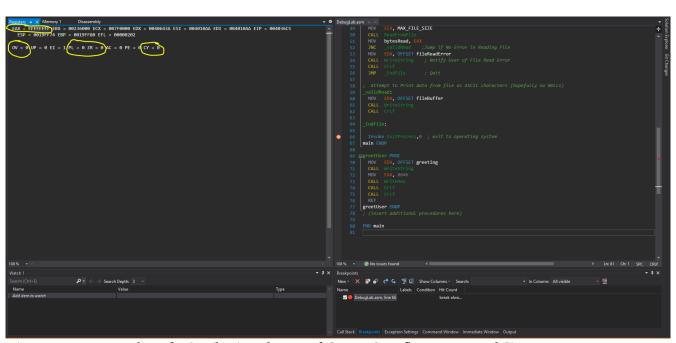

Figure 1: Part 1: Value of EAX (hex) and state of Carry, Overflow, Zero, and Sign

# **Part 2 – Navigating Code and Procedures**

1. User number in terminal window, along with registers and editor windows.

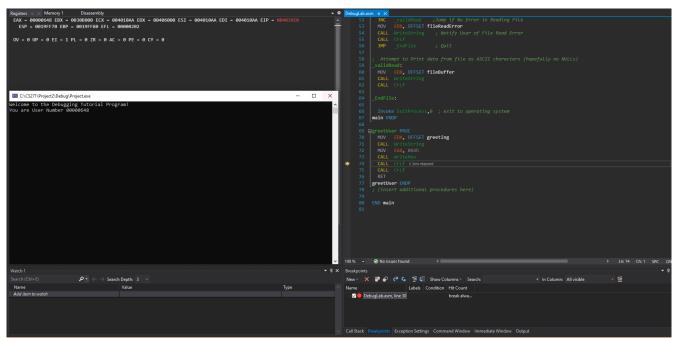

Figure 2: User Number in EAX along with Registers/Editor on screen

#### Part 3 – Disassembly View

- 1. Memory address of the instruction located at \_validName label = 040368Ah
- 2. The instruction mov is stored along with its operands eax and fileHandle.

```
Registers
                       Disassembly # X
Address: main(void)

    Viewing Options

   ; Greet the User
00403660 call greetUser (04036CCh)
 00403665 mov edx, offset fileName (0406041h)
00403674 cmp eax,0FFFFFFFh
• 00403677 jne __validName (040368Ah) ≤1ms elapsed
 00403683 call _Crlf@0 (04010FAh)

JMP _EndFile ; Quit

00403688 jmp validName+3Bh (04)
 00403688 jmp
    MOV FAX, fileHandle
 9040368A mov eax,dword ptr [fileHandle (040604Ah)]
    MOV EDX, OFFSET fileBuffer
```

Figure 3: Instructions and operands circled at the code segment address from question 1.

3. The EIP is the 32bit instruction pointer register, and holds the address of the next instruction to be executed. Thus, the leftmost value on any given line is the memory address of the instruction to be executed, as such, it will be stored in the EIP in the Register window.

#### **Part 4 – Spelunking through Memory**

1.

```
Last 3 digits of ONID id = 648
```

n = 648

(n + 1)st byte (index n) = 649th byte of TestText.txt = s

2.

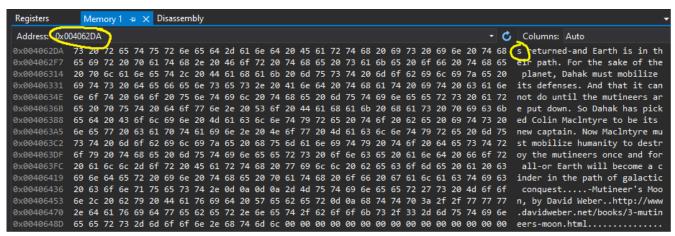

Figure 4: Memory window with value in address bar circled, as well as its ASCII representation

### Part 5 - Keeping Careful Watch

1. Unsigned value of fileHandle = 240

```
| Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | P + C | Search Depth: 3 | Search (Cirl+E) | Search Depth: 3 | Search (Cirl+E) | Search Depth: 3 | Search Depth: 3 | Search (Cirl+E) | Search Depth: 3 | Search (Cirl+E) | Search Depth: 3 | Sear
```
